

WEB DEVELOPMENT INTERNSHIP

CodSoft • Virtual Internship • 15 July 2026 – 15 August 2026

SANSKAR RAI

25SCS1003003573 • 2CSE33 • B.Tech CSE Core

Introduction & Student Credentials

Student

Sanskar Rai
Roll No.: 25SCS1003003573
Section: 2CSE33

Academic

B.Tech CSE Core
IILM University, Greater Noida
Batch: 2025–2029

Internship

CodSoft
Web Development
Virtual Internship

Four-week internship focused on practical front-end development.
Completed all three Level 1 tasks assigned for the internship.

Candidate & Program Overview

Internship Period

15 July 2026 – 15 August 2026

Internship Domain

Web Development • Level 1

Learning Mode

Virtual, project-based learning with browser testing, documentation and GitHub repositories.

Completed Work

Portfolio Page • Brightly Landing Page • Simple Calculator

Organization Profile

CodSoft is presented in its internship material as a technology education and software development platform.

Focus: converting theoretical knowledge into practical expertise through virtual internships and project-based learning.

Career-oriented ecosystem includes learning resources and tools for aspiring developers.

Web Development internship emphasizes hands-on projects, GitHub-based work and project demonstration.

Internship Structure

Level 1 tasks were designed around HTML, CSS and JavaScript fundamentals.

Completed: 3 / 3 Level 1 projects.

Problem Statement & Industry Context

The Gap

Beginners may understand individual HTML, CSS and JavaScript concepts but struggle to combine them into complete, usable web projects.

Practical Need

Web development also requires layout, responsive design, visual hierarchy, interaction, debugging and project organization.

Internship Approach

Three progressively practical tasks moved from a personal static site to a structured landing page and finally an interactive JavaScript calculator.

Core Project Objectives

Build practical confidence with HTML5 page structure.

Apply CSS3 styling, Flexbox, Grid and responsive design.

Create a personal portfolio and a professional landing page.

Use JavaScript event listeners, DOM interaction and conditional logic.

Practice browser testing, debugging and project documentation.

Maintain separate GitHub repositories for the completed tasks.

Technology & Tools

HTML5

Semantic structure, sections, content and page markup.

CSS3

Flexbox, Grid, spacing, colors, transitions and responsive layouts.

JavaScript

Event listeners, DOM interaction, button actions and calculator logic.

Git & GitHub

Separate repositories for the three internship tasks.

VS Code

Project development and file management.

Browser Testing

Direct local execution and visual/functional verification.

Project 1 — Personal Portfolio Page

Purpose

Present profile, objective, skills, certificates, education and contact information.

Key Features

30:70 frameset layout, social cards, skills, certificates and resume download.

Skills Practiced

HTML structure, CSS Flexbox, styling, responsive content and basic JS.

Project 2 — Brightly Landing Page

Purpose

Create a clean, responsive landing page for a productivity/workday concept.

Sections

Header, hero, features, about, CTA/contact and footer.

Skills Practiced

Semantic HTML, Flexbox, spacing, color consistency and mobile breakpoint.

Project 3 — Simple Calculator

Interface

Digits 0–9, decimal point, +, −, ×, ÷, C, DEL and =.

JavaScript Logic

Button listeners, input string handling, operator detection and if-else calculation.

Error Handling

Division by zero or invalid expressions display an error instead of crashing.

Design

CSS Grid layout with a double-width 0 button and double-height equals button.

Circular / Project Timeline

Project-phase timeline based on the completed work; not an official day-by-day CodSoft schedule.

Demonstrated Skills

Technical Skills

HTML5 • CSS3 • JavaScript
Flexbox • CSS Grid • Responsive Design
DOM interaction • Event listeners • Basic debugging

Development Practices

Project organization • README documentation
GitHub repositories • Browser testing
Basic error handling • UI consistency

Design Skills

Layout hierarchy, spacing, typography, color palettes, feature cards and responsive behavior.

Problem-Solving

Translating task requirements into working pages and interactive logic; identifying and handling invalid calculator input.

Certificate & Official Verification

Completion Certificate

C.ID: ebd49a5
Web Development
15/07/2026 – 15/08/2026
Certificate date: 16/08/2026

Offer Letter

ID: BY26RY219648
Issued: 13/07/2026
Internship period: 15/07/2026 – 15/08/2026

Project Verification

Three separate GitHub repositories were maintained for the Portfolio, Brightly Landing Page and Calculator projects, matching the internship documentation requirement.

Internship Completion Certificate

C.ID: ebd49a5

CERTIFICATE

OF COMPLETION
PROUDLY PRESENTED TO

Sanskar Rai

has successfully completed 4 weeks of a virtual internship program in

Web Development

with wonderful remarks at **CODSOFT** from 15/07/2026 to 15/08/2026.

We were truly amazed by his/her showcased skills and invaluable contributions to the tasks and projects throughout the internship.

Founder

THANK YOU
